Re: PACBOR – “Wine Taint”

To: Whom it May Concern

The Pacific Wood Preserving Companies utilize the PACBOR brand of Disodium Octaborate Tetrahydrate (a.k.a borates). The manufacturer of the preservative is Preservabalance, Inc. Our advising chemist has informed us that disodium octaborate tetrahydrate “is an entirely inorganic mineral salt preservative and it is completely free of TCA (Trichloroanisol) connected with wine contamination.”

Should you have any further questions, please do not hesitate to contact me at 775-832-5225.

Best regards,

Elaina Jackson
Chief Operating Officer
